A DIAGRAM TO ILLUSTRATE

THE HARMONIOUS RELATIONS OF COLOUR.

Prepared for the Use of Schools in connexion with the

DEPARTMENT OF PRACTICAL ART.

I. THERE are thee fimple or primary Colours which cannot be produced by mixture:—namely, YEL-LOW, RED, and BLUE. From thefe three in various proportions all other Colours are compofed.

Relations of Colour. III. THE mixture of se-L condary Colours produces the *tertiary* Colours. Thus Orange and GREEN, produce Citrine: PURPLE and GREEN, Olive: ORANGE and PURPLE, Ruffet: each tertiary therefore is composed of two fecondaries, and is in harmony with the third, or that which does not enter into its own composition: thus Citrine is in harmony with Purple, Olive with Orange, and Ruffet with Green.

II. TWO primary Colours being mixed a fecondary Colour is the refult. Thus RED and YELLOW produce the secondary ORANGE: BLUE and YELLOW, GREEN: and RED and BLUE, PURPLE.

IV.

A LL thefe are called hues of Colour which may be diluted into tints by White, or deepened into fhades by Black.

TO fatisfy the eye and produce Harmony of Colour, the prefence of all the three primaries is required, either pure or in combination: thus RED when not fupported by due quantities of pure YELLOW and BLUE is harmonized by the fecondary GREEN, which is a union of those two primaries: and which is therefore called the complementary colour of RED; for the fame reason PURPLE is complementary to YELLOW, and ORANGE to BLUE.

N.B. The arrowheads in the centre of the Diagram point back to the oppofite complementary or harmonizing Colour of the primaries. The tertiary colours are in harmony with the fecondary with which they are grouped in the diagram.

Some Qualities and Properties of Colour.

VI.

YELLOW is of all Colours the neareft allied to light, whilft its complementary PURPLE is the darkeft of all hues: they contraft therefore as to light and dark.

VII.

RED is the moft exciting and politive of all colours, its complementary, GREEN, the moft grateful and foothing. RED and GREEN are non-contrafting as to light and dark, but they are contrafting as to their power of exciting the eye and as to power of Colour.

VIII.

BLUE is the coldeft and most retiring of all Colours: its complementary ORANGE the warmest and most advancing. Their contrast is both as to advancing and retiring, and as to hot and cold.

IX.

WHILST the union of two primaries refults in a new and perfect hue, every mixture of the three has a tendency to neutralize or deftroy Colour: from this caufe the tertiary compounds are far more neutral than the fecondaries. The full neutralizing power of the primaries is in the proportion of three YELLOW, five RED, and eight BLUE,

fince fo mixed they completely deftroy one another.

T fhould be remembered that as any one of the primary colours, by mixture with either of the others, lofes its purity and becomes *in a degree* fecondary, the fecondary which is complementary to it muft contain more of the remaining primary: thus if RED tends towards *Scarlet*, which is an *Orange-Red*, (a Red with Yellow in it) the GREEN to be truly complementary fhould incline towards the remaining primary, BLUE, and be a *Blue-Green*: when the RED, on the contrary tends towards *Crimfon* which is a *Purple-Red*, (a Red with Blue in it) then the complementary GREEN fhould incline towards YELLOW, and be a *Yellow-Green*: and the like rule holds good as to the other primaries. It is to be remarked that the material Colours of the painter are only the reprefentatives of Colour, more or lefs perfect, yet ftill defective.

It is defirable that every Student fhould make a copy of this Diagram as foon as poffible for his own ufe and be ready to answer the questions which have been prepared to accompany it.

Publifhed by Authority by CHAPMAN AND HALL, 193, PICCADILLY, LONDON. *Price One Shilling*.

Manufacturers requiring any quantity for diftribution in Schools and Workshops, can have them at a reduced price by applying direct to the Publishers. An enlarged Diagram about 6 feet by 4 feet is prepared for large Schools, and may be had of the Publishers.
